

7580FIT Chek-Lok® Actuated Liquid Withdrawal Excess Flow Valve For Stationary Containers

7580FIT

Application

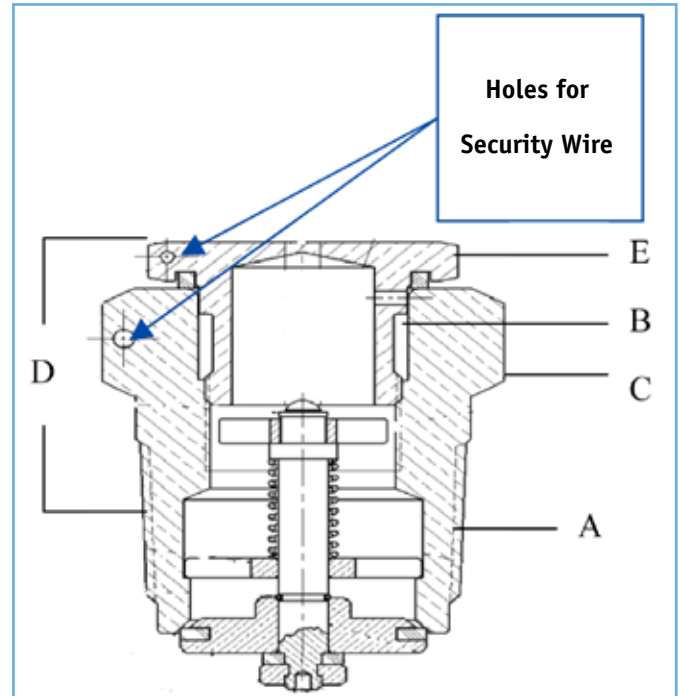

The Chek-Lok® makes it possible to use only one transfer shutoff valve interchangeably ...on any number of containers in service, as the need for liquid transfer or evacuation arises. With RegO Chek-Loks® on all your tanks, and having the high capacity 7550P Series transfer valve and the 7572C-14A chek-lok® adapter standard equipment on your service and delivery trucks, the need for individual transfer valves at each tank is eliminated.

Features

- Precision machined. Designed specifically for use with RegO Chek-Lok® adapters.
- Security wire holes machined in body and cap
- Eliminates need for individual transfer valves at each container.
- Specify RegO Chek-Loks® on all your original tank purchases to insure quality and dependable performance.

Materials

Body	Brass
Stem	Brass
Spring	Stainless Steel
Seals	Synthetic Rubber
Valve Poppet	Brass
Gasket	Nylon
